## CERTIFICATIONS

## WHAT IS LEAF•COAT™?

Leaf•Coat™ is a ready-to-use product that strengthens and protects plants against unwanted insects and damaging leaf fungi. Made from natural latex that was originally developed to prevent evaporation, it creates a permeable, self-degradable barrier on the leaf, which still allows air and light to get through.

### Why Leaf•Coat™ offers better protection in all conditions

If the atmosphere gets too hot and humid (over 28°C), Leaf•Coat™ helps prevent the plant from losing too much water through evaporation. At the same time, the natural latex layer it forms around the leaves, helps the

## STRENGTHNER

plant breath and stops it from 'sweating'. Then when the temperature drops, such as in winter months, Leaf•Coat™ safeguards against the cold by helping maintain the leaf temperature.

As an environmentally friendly alternative to pesticides, Leaf•Coat™ couldn't be more suitable or safer to use. Reducing the need to use pesticides also saves money. And unlike synthetic and toxic products it has a pleasant smell, and doesn't irritate. Because Leaf•Coat™ doesn't get absorbed by the leaves, it doesn't affect the taste of the fruit either.

## BOTTLES

250ML, 500ML, 1L, 5L, 10L, 20L

SETTING	PHASE	FUNCTION
 INDOOR	 GROWING	 PREVENTING
 OUTDOOR	 BLOOMING	

## HOW TO USE IT

There's no need to mix Leaf•Coat™ with water – simply apply straight from the bottle, preferably from an atomiser. Spray the leaves and flowers completely, and repeat this about two times a week until a fortnight before the end of the flowering period. Within a few hours of application, a very thin elastic layer – 1.5 microns thick – forms on the leaves. Its beneficial effects last for up to two weeks until it is naturally decomposed by light or sunlight.
