

LUMii SunBlaster

LUMii SunBlaster Dual Spectrum HPS Lamps

The LUMii SunBlaster HPS offers exceptionally high output. Couple this with raised spectral discharge in the reds and blues (exactly the right spectral energy distribution curves that your plants need to thrive) and a long lamp life, and you have the perfect plant grow light.

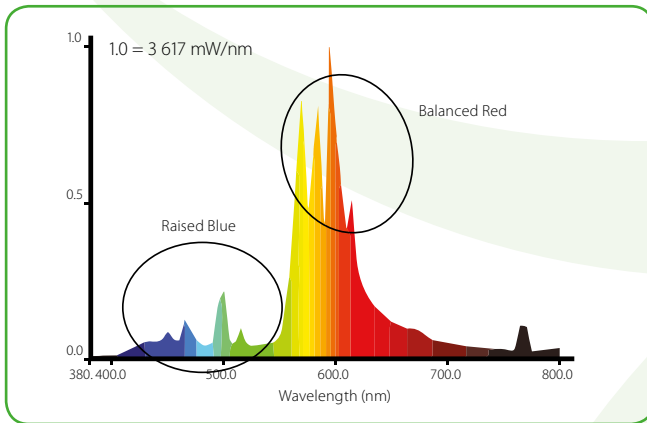

Available in 400 watt and 600 watt.

Both have 32,000 life hours.

Available
in 400w
& 600w

We recommend using LUMii SunBlaster lamps with all the LUMii ballast range, as we design our units to be optimised with these mix spectral high output lamps. If using another brand of lamp, please make sure it is from a quality producer to be able to get the most from your LUMii ballast.

LUMii CFL Lamps

LUMii Energy Saving CFL Grow Lamps

The LUMii Energy Saving CFL Grow Lamp is the low energy option for you. Available in both Warm and Cool White, these lamps can easily be interchanged.

The LUMii Energy Saving CFL Grow Lamp is a high output 125 watt 5U CFL.

Warm Lamp: 2700k

Cool Lamp: 6400k
